

Marsh Radiator Traps and Repair Parts

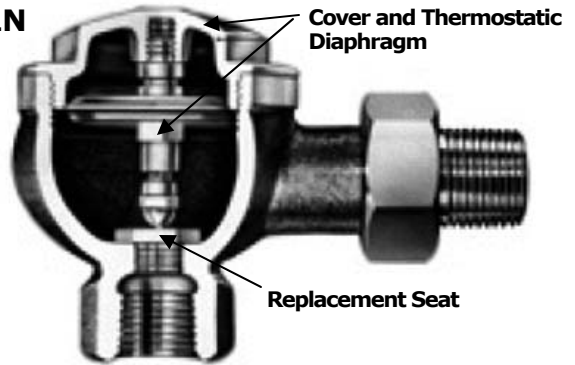

Complete steam traps and repair parts are on-the-shelf ready for same-day shipping.

Marsh radiator traps are not often sold in their complete product form. Most customers simply purchase the repair parts or replacement components to bring their old Marsh steam traps back into a like-new condition.

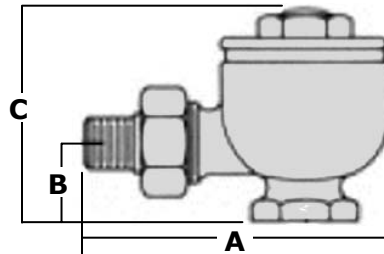

However, a limited supply of complete traps are kept in inventory.

NOTE: Marsh no longer makes the left-hand, right-hand and vertical styles of steam traps.

No. 1N

Trap Dimensions

Complete Steam Traps

Alternative Cage Units and Capsules

Many steam trap manufacturers offer alternative thermostat assemblies to replace the original equipment. Tested over extended periods of time and calibrated to close for a tight, leak-proof seal, these alternative thermostat assemblies (often called cage units or capsules) have a proven track record of long-lasting durability and premium performance.

Thermostatic Cage Units are recommended for reliability, durability and efficiency! →
